

ODI and EXASOL

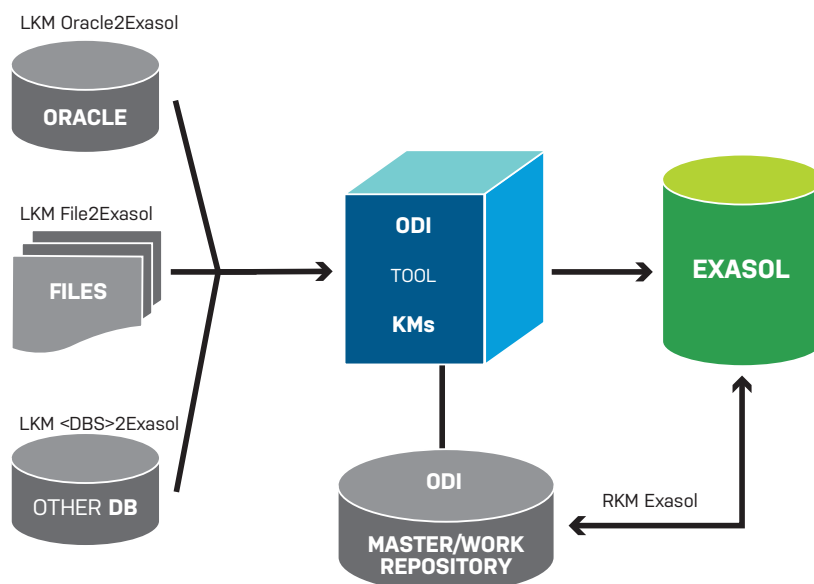

Link2Go is the solution

EXASOL AND ORACLE DATA INTEGRATOR (ODI) ARE A PERFECT TEAM

EXASOL, the „world fastest DWH database“, can be easily integrated within your existing DWH environment. There is no need for continuous tuning operations and it can even handle expensive ad-hoc queries. ODI, a strong and flexible ETL tool, is a good solution to meet your individual requirements for data integration.

If you decide to use EXASOL as an accelerator for your Oracle DWH and are using ODI as an ETL tool, our Sphinx "Link2Go" bundle is the perfect solution. The bundle connects both technologies almost seamlessly to create a high performing and easy to administer DWH solution.

TARGET ARCHITECTURE

WHICH COMPONENTS ARE REQUIRED?

- EXASOL
- Oracle Data Integrator
- ODI Knowledge Module (KM) for EXASOL - Link2Go

You can immediately start developing your ELT/ELTs as soon as the knowledge modules have been installed and configured.

WHAT'S IN THE LINK2GO BUNDLE?

The Link2Go knowledge modules

- Reverse Engineering Knowledge Module „RKM Exasol“
- Loading Knowledge Module „LKM Oracle2Exasol“
- Loading Knowledge Module „LKM File2Exasol“

Sphinx will provide the bundle free of cost and for unlimited use.

The Link2Go service

We offer a 3 man-day installation and setup service, which can be performed at the customer site or remotely. Included in this service is the installation and customer-specific configuration of the knowledge modules.

WHAT IS POSSIBLE WITH THE LINK2GO KNOWLEDGE MODULES?

RKM Exasol is used to reverse engineer the structure and definition of the EXASOL objects (such as tables and views) within the ODI repository. The objects created in the repository are now ready for use by the user for their ODI development.

LKM Oracle2Exasol is used to create the correct EXASOL statements to load data from an Oracle database to EXASOL.

LKM File2Exasol is used to create the correct EXASOL statements to load data from flat files to EXASOL.

HOW CAN I GET THE LINK2GO BUNDLE?

Contact Information: **DI Ingrid Kriegl** | +43 1 599 31 - 0 | ingrid.kriegl@sphinx.at

With Link2Go Sphinx IT Consulting offers the perfect product bundle for integrating two technologies:

EXASOL - the smartest and fastest DWH technology available

Oracle ODI - one of the strongest and most flexible ETL Tools on the market

We can also provide knowledge modules for loading EXASOL from other database systems, such as Sybase or MS SQL Server.

Based on the motto of sphinx

MASTERING THE GAP
